## **Algebraic Topology Hatcher Solutions**

Algebraic Topology. This book, published in 2002, is a beginning graduate-level textbook on algebraic topology from a fairly classical point of view. To find out more or to download it in electronic form, follow this link to the download page.

## **Allen Hatcher's Homepage - Cornell University**

ALLEN HATCHER: ALGEBRAIC TOPOLOGY MORTEN POULSEN All references are to the 2002 printed edition. Chapter 0 Ex. 0.2. Define  $H: (R^n - \{0\}) \times I \rightarrow R^n - \{0\}$  by  $H(x,t) = (1-t)x + t|x|x$ ,  $x \in R^n - \{0\}$ ,  $t \in I$ . It is easily verified that  $H$  is a homotopy between the identity map and a retraction onto  $S^{n-1}$ , i.e. a deformation retraction. Ex. 0.3.

## Topology 2: Algebraic Topology

HATCHER'S ALGEBRAIC TOPOLOGY SOLUTIONS REID MONROE HARRIS Van Kampen's Theorem Problem 1. Suppose  $G$  and  $H$  are nontrivial groups. Suppose  $x = g_1 h_1 \cdots g_n h_n$  lies in the center of  $G * H$ , where  $g_i \in G$  and  $h_i \in H$ . For any  $g \in G$ , we have  $g x = x g$ . This implies  $g g_1 h_1 \cdots g_n h_n = g_1 h_1 \cdots g_n h_n g$ . Canceling  $g_1 h_1 \cdots g_n h_n$  from both sides yields  $g = g$ . The only way for this to be true for all  $g$  is if  $h_i = 1$  for all  $i$ .

## Van Kampen's Theorem

Let  $U$  be a topological space and  $H_1(U)$  is the union of open sets of the form  $W \times W$  containing  $x$ . Since  $I$  is compact, by Tube Lemma  $W \times W$  contains a tube  $V \times I$  about  $x$  where  $V$  is a neighborhood of  $x$ . So the restriction of  $H_1$  to  $V \times I$  is a map from  $V \times I$  to  $U$ . 2. Let  $i: V \rightarrow U$  be an inclusion. Then  $i_* \pi_1(V) \subset \pi_1(U)$ .

## **Algebraic Topology, WS 2018/19 - UKR**

To paraphrase a comment in the introduction to a classic point-set topology text, this book might have been titled What Every Young Topologist Should Know. It grew from lecture notes we wrote while teaching second-year algebraic topology at Indiana University. The amount of algebraic topology a student of topology must learn can be intimidating.

## **Lecture Notes in Algebraic Topology - Indiana University**

In the 1960s Cornell's topologists focused on algebraic topology, geometric topology, and connections with differential geometry. More recently, the interests of the group have also included low-dimensional topology, symplectic geometry, the geometric and combinatorial study of discrete groups, and dynamical systems.
