Understand the ignition cycle. The four "strokes" in the 4-cycle engine refer to the process of intake, compression, power, and exhaust. The timing of the ignition refers to the point between the compression and the power strokes at which the spark plug fires, creating the combustion that results in your horsepower, forcing the piston down into the cylinder.

To set the timing follow these steps: turn engine off. Set parking brake. Put transmission in neutral so that the engine will turn by hand. turn engine by carefully turning fan clockwise, until the timing marks line up (5 or 7 degrees BDTC). If the fan belt slips, you are turning it too fast -- or the belt is too loose (tighten it!)
