If you're looking for a free Epson RIP then this is the closest you will ever get. The second component of this project will be a plugin written in C# for Gimp that will create two layers from an image. One for a white underbase and another for the image to be printed on a garment. Please send me a message if you are interested in being involved.

GutenRIP™ download | SourceForge.net

A RIP program is similar to the print driver included with your printer, but with much more control (and features). A RIP is designed to handle many files, file types, and file sizes without limiting your print capabilities. A RIP efficiently processes your files faster and more consistently, resulting in faster print times and less waiting.

Do you really need a RIP software to run large format prints?
