The 17-horsepower Kawasaki is a single cylinder, air-cooled engine. The carburetor delivers the fuel from the gas tank and the air that is sucked through the air filter to the engine cylinder for combustion. It is a delicate mixture, and if the mixture becomes out of adjustment it can cause the engine to surge and perform poorly.

Sometimes adding new features and software to an existing product works out well; sometimes it doesn't. Ask Boeing or a Kardashian. Kawasaki's pre-existing Versys 1000 was a nice-enough but completely nondescript motorcycle until the company decided to throw fresh gadgetry at it for 2019, to the tune of about 50% of the purchase
