ZF Marine Electronics / Mathers History, ZF Marine Electronics, formerly Mathers Controls, introduced the industry's first single lever control in 1987 and has been the leader in electronic engine controls for marine vessels, yachts, and pleasure boats ever since.

ZF Marine Electronic Engine Controls - Electronic Marine ...

All ZF control systems use either 12 or 24 VDC supplied power. For applications using electronic shift, the input voltage to the processor must be equivalent to the voltage required by the shift solenoid. The maximum power requirement while driving a servo for mechanical actuation is 160 Watts. I have an older Mathers system on my twin screw boat.
